Tom/Doug,

Below is the login information for Viper on Virtual Machine 7. There is a saved template on that VM for the current configuration.

Let us know if you have any questions or issues.

Thanks,

Melissa Bryant

Hi Dave,

We have assigned VM7 for the R07 Bridgeton Dust site. To access the virtual machine, you'll need to use Remote Desktop Connection with the following login info:

Computer =
Username = **Ex. 6 - Personal Privacy**
Password =

Ex. 6 - Personal Privacy

I have added Gateways 100, 102 and 51 and Lincs 131 and 132 to the equipment inventory on the Virtual Machine. Let us know if you are able to access the VM or if you need us to configure the runs.

Thanks,

Melissa Bryant
